Objective

Java Backend Developer with 1+ year of experience building RESTful APIs using Java, Spring Boot, and MySQL. Skilled in Spring Security, JWT authentication, Redis caching, and scalable backend systems. Experienced in designing secure and high-performance web applications.

Technical Skills

Programming Languages: Java, SQL, JavaScript

Core Java Concepts: OOP, Collections Framework, Exception Handling, Multithreading

Backend Technologies: Spring Boot, Spring MVC, Spring Security, Hibernate, JPA, RESTful APIs

Frontend Technologies: Angular, Thymeleaf, JSP, HTML5, CSS3, Tailwind CSS

Databases: MySQL, MongoDB, Redis, H2

Tools & Platforms: Git, GitHub, Maven, Postman, Swagger, IntelliJ IDEA, VS Code

Work Experience

Java Software Engineer | [CodeTrex Infotech Pvt. Ltd.](#)

2025 – Present

- Designed and delivered **RESTful APIs** using Java, Spring Boot, and Spring MVC for **3+** production applications.
- Applied **Redis caching** to reduce API response time by 30% and minimize database load.
- Required **JWT-based authentication and role-based authorization** using Spring Security.
- Integrated **Email and WhatsApp OTP services** for secure user verification and login workflows.
- Improved **MySQL and MongoDB queries** to improve performance of high-traffic endpoints.
- Built reusable components following **SOLID principles** and **layered MVC architecture**.
- Integrated **Hibernate ORM, Spring Data JPA, and Azure Blob Storage** for data persistence and file uploads.
- Participated in **Agile/Scrum sprints**, peer code reviews, and API documentation using **Postman**.

Java Developer Intern | [CodeTrex Infotech Pvt. Ltd.](#)

January 2025 – May 2025

- Contributed to a full-stack application using **Spring Boot, Spring MVC, Hibernate, and MySQL**.
- Built and tested **REST APIs** using **Postman**.
- Wrote optimized **SQL queries** and executed database operations using **Hibernate ORM**.
- Fixed bugs and refactored Java code to improve **readability and maintainability**.

Projects

SS Engineers - B2B Service Booking Application

- Re-engineered a **B2B service booking platform originally built in .NET** by implementing the backend using **Java, Spring Boot, and Spring MVC**.
- Planned and developed **RESTful APIs** for service booking, user management, and service listings using Spring Boot and JPA/Hibernate.
- Implemented **role-based authentication and authorization** using **Spring Security** for admin and user operations.
- Integrated **Redis Cache** to improve API response time and reduce database load for frequently accessed booking data.
- Configured **Azure Blob Storage** for secure storage and retrieval of service-related documents and media files.
- Integrated **Firebase Cloud Messaging (FCM)** to send real-time push notifications for booking confirmations and updates.
- Implemented **OAuth-based social login** (Google, Facebook, Instagram) for seamless user authentication and onboarding.

MyDGC - MLM / E-Commerce Platform

- Enhanced a full-stack **MLM and E-commerce Management System** using **Spring Boot** and **Hibernate** for efficient data management.
- Applied key e-commerce features including **Product Management, Order Processing, and PDF Invoice Generation** using the **iText Library**.
- Built functionality to track **MLM Downline Structure** using **Recursive Tree Traversal Algorithms**.
- Expanded **RESTful Admin APIs** with **Spring Security** and **JWT Authentication** for **User Management and Order Tracking**.

Education

Bachelor of Technology | Dr. A.P.J. Abdul Kalam Technical University | Aug 2024 | **CGPA: 7.39/10**
Intermediate | Gyanoday Inter College, Kushinagar | June 2020 | **71%**
High School | Gyanoday Inter College, Kushinagar | June 2018 | **83%**

Certification And Achievements:

- Monthly Daily Challenge Badge – **LeetCode**
- Problem Solving (Basics) Certificate – **HackerRank**
- Data Structures and Algorithms using Java – **Coding Blocks** (Certificate)

Additional

Interests: currently exploring cloud technologies such as AWS and Docker, learning to build microservices, and getting familiar with DevOps practices like Jenkins and Kubernetes, along with cloud-native development.
